

Application Summary

Personal Information

First Name	Middle Name (Optional)	Last Name
KINGSLEY	UKEME	MATTHEW
Email Address	Phone Number	Gender
Kingpin4sure@yahoo.com	0703-065-2203	Male
Date of Birth	National Identity Number (NIN)	Address
06/10/1991	54714230573	GAWUNA, BRIGADE QUATERS KANO
State of Origin	Local Government Area	State of Residence
Akwa Ibom	Mkpat-Enin	Kano
Profile Image (Optional)	Do you have any disability?	
	None	

Educational Background

Highest level of education	Course of study	Have you completed NYSC?	NYSC Completion Year
Bachelor's Degree	Computer Science	Yes	2018
Level of digital literacy	Preferred language of communication	English Speaking Fluency	English Writing Fluency
Advanced (Programming languages, coding)	English	Advanced	Advanced

Professional Experience

Are you currently employed?	Select at least two sets of skills you possess	
No	Computer Skills, Teamwork, Learning/Adaptability	
Where would you like to work?	In which sector do you like to work?	If Other, please specify?
Akwa Ibom, Rivers, Enugu	ICT	ICT

Personal Essay

Personal Statement *(under this section, provide your motivation for applying to the Programme)*

Firstly,am so excited when i heard of this program,honestly the federal government is really trying to empower and help the young growing youth.

What motivated or inspired me to apply to this programme is that this program will enable me in learning new things, because from the nature of the program i'm not seeing it as an individual kind of job but a job where i will meet with other young talented individuals who are also in my field of career. I just believe that the job will expose me to more and advance ideas and knowledge on information and communication skills. Also the program will help me in acquiring new skills from other fellows who i will work with when am shortlisted.

Secondly, i have seen also that the program will help me to also impact knowledge on others that is coaching others on what i have also learnt from other individuals who are above me in experience. With my vast experience in information and communication technology i believe i will be an added advantage to the team i will be working with.

Finally, i like developing my self and i love team work. i came to understand that the program will help me to improve my team work skills or leading a team or being part of a team which i enjoyed a lot. It will also help me to improve my skills in problem finding as well.

Please, i seriously need this program. since i graduated from school since 2017 i have been suffering with my family members please consider me on this program. please sir or ma. God bless you as God will use you to help me from this poverty.

Professional Experience Summary

In 2011 i attended Digital team concept, computer training school where i undergo a diploma program on information technology. I graduated with a merit and the same year i also went for my post graduate in information technology and i graduated with distinction.

During that period i was an instructor in the same computer school where i also trained other individuals on what i have learnt so far.

In 2012 i got admission to study computer science in higher institution where i obtained Bachelors degree in computer science

From 2011 to 2018 the below was my professional experience

SYSTEM ADMINISTRATOR – DATABASE MANAGEMENT UNIT (2013 – 2017)

APPLICATIONS DEVELOPER AT DIGITAL TEAM CONCEPT. (2016-2018)

TEACHING JOB AT GOVT. BOYS SCHOOL KEBBI STATE (NYSC) (2017-2018)

SOFTWARE AND WEBSITE DEVELOPER (2017 TO PRESENT)

My future plan aspirations in the world of information and communication technology is to further my studies up to professor or doctorate degree, but the money to further right now is not available due to lack of Job. I will like to advance my knowledge to a level of cyber security specialization.

Nevertheless, I will like to own a business organization where I will help online businesses to grow without stress and free from cyber attack. I will also like to employ younger youth to work with me. I will like to fight against all this cyber crime going on in the country, because it hurts when someone is scammed on his hard earned money.

I will also like to work with security agencies to enable all online platforms to be secured for online business owners and other transactions.

Finally, I will like to own an information and communication technology school where I will run programming programs and other ICT programs to empower the younger generation as well.

Please explain why you are interested in your chosen career field

As a matter of fact, we are living in a constantly evolving digital world. ICT has an impact on nearly every aspect of our lives from working to socializing, learning to playing. The digital age has transformed the way young people communicate, network, seek help, access information and learn. We must recognize that young people are now an online population and access is through a variety of means such as computers, TV and mobile phones. In addition, it is in this premise that educational technology and e-learning is taught in or out of the classroom since educational technology is used by learners and educators in homes, schools, businesses, and other settings.

Secondly, information and communication technology is also very important in our daily lives. The lack of appropriate information at the right time will result in low productivity, low quality research works, and waste of time to pursue information and even to do research which actually others had done or in other countries. Nowadays ICT cannot be separated with our daily needs.

For example, we can read our local newspaper using the online newspaper. Another example is we still can get connected with our family, relatives, or colleagues even if we are abroad by using the electronic mail, yahoo messenger, call conference, or video conference.

Finally, digital computer and networking has changed our economy concept to the economy with no boundary in time and space because of ICT. It brings a lot of advantages for economic development enabling millions of transactions to happen in an easy and fast way.

Furthermore, with the few reasons I listed above, this has made me to develop an interest in the area of my chosen career for this program.

How do you hope the support that you get from the NJFP will help you achieve your career goals?

i believe that the support i will get from this program will help me alot, especially to achieve my career goals.

Nowadays,ICT is one of the economic development pillars to gain national competitive advantage. It can improve the quality of human life because it can be used as a learning and education media, the mass communication media in promoting and campaigning practical and important issues, such as the health and social area. It provides wider knowledge and can help in gaining and accessing information. ICT has become an integral part of everyday life for many people. It increases its importance in people’s lives and it is expected that this trend will continue, to the extent that ICT literacy will become a functional requirement for people’s work, social, and personal lives.

- 1) From the support of NJFP, i believe i will be able to improve the quality of human life, business, learning platform by developing quality websites and mobile applications that will enhance this process.
- 2) From the support of NJFP, i will learn new skills from people or colleague who are more advanced than me
- 3) With the support of NJFP, i will be able to run a business of my own and employ other individuals to work with me as well.
